DANIEL OLUWANIFEMI OSO

APPLICATION SUPPORT OFFICER

+2349135513541 | danieloluwanifemi2002@gmail.com

SUMMARY

Application Support professional with hands-on experience across infrastructure troubleshooting, web server administration, database management, and CMS/web platform support. Skilled at diagnosing and resolving multi-layered technical issues — spanning network connectivity, DNS, SSL/TLS, firewall configuration, and database access — using a structured, evidence-based troubleshooting approach. Experienced in server-to-server data migration, vendor coordination, and producing clear technical documentation and stakeholder reporting. Front-end development background (HTML, CSS, JavaScript) and a fast-growing foundation in cybersecurity operations, currently pursuing further specialisation in the field. Strong communicator and solution-oriented team player with a quick learning curve.

EXPERIENCE

Application Support Officer | *FMDQ Group – Applications Management Group (AMG)* August 2024 – Present

- Provide first- and second-line application and technical support across FMDQ Group's web platforms, internal systems, and infrastructure, covering system monitoring, troubleshooting, and incident resolution.
- Diagnose and resolve multi-layered connectivity issues on production systems including SSL/TLS certificate mismatches, and database connection failures.
- Administer and troubleshoot Apache/Nginx web servers and aaPanel-managed hosting environments, including WordPress and Elementor CMS compatibility issues across multiple subdirectory sites.
- Identify and remediate database availability issues on MySQL/MariaDB servers, including recovery from out-of-memory failures and correction of insecure service configurations, restoring both authentication integrity and remote connectivity.
- Manage server-to-server data migrations and large-file transfers, with attention to data integrity verification and minimal service disruption.
- Digitise legacy records into a central database with a focus on data accuracy and integrity.
- Test and validate models supporting internal systems, including property ownership verification workflows.
- Coordinate vendor security and compliance documentation and prepare IT change management requests for infrastructure changes.
- Document workflows and support internal knowledge base development.

Adhoc Digitizing Officer | *Detamainingu Limited* October 2023 – April 2024

- Supported database migration through large-scale document digitisation and data entry.
- Conducted quality checks, error tracking, and ensured adherence to digitisation protocols.
- Assisted in building simple verification models using internal platforms.
- Maintained digital file accuracy and followed best practices in information management.

Website Developer | *Idea Consult* October 2023 – February 2024

- Designed and maintained scalable websites with user-centric design in mind.
- Collaborated with internal teams to troubleshoot user experience (UX) and browser compatibility issues.
- Conducted basic testing and documentation for feedback loops.

Student Intern, Management Information Center | *Office of the Governor, Oyo State* September 2022 – February 2023

- Developed and maintained internal web platforms for state use.
- Supported the Smart Card project for civil servants, including user data collection and upload.
- Worked alongside application support staff to improve system accessibility and performance.
- Assisted in SEO optimisation, front-end debugging, and system reporting.

EDUCATION

B.Sc. Computer Science | *Kwara State University, Malete, Kwara State* August 2018 – September 2023

CERTIFICATIONS

- Front-End Web Development — META (Coursera), 2024 — Web application structure and styling.
- Git & GitHub for Version Control — Google (Coursera), 2022 — Version control fundamentals and collaborative workflows.

SKILLS

Technical: Linux Server Administration (aaPanel), Apache & Nginx Configuration, MySQL/MariaDB Database Administration, SSL/TLS & DNS Troubleshooting, WordPress & Elementor CMS, SQL (Basic) & MSSQL Export Workflows, Front-End Development (HTML, CSS, JavaScript, React), Version Control (Git & GitHub), VS Code, Microsoft Excel & PowerPoint, File Management Systems, Software Testing (Functional & UI), Performance Monitoring, System Documentation, Incident & Ticket Management.

Professional: Problem Solving, Critical Thinking, Root-Cause Troubleshooting, Communication, Team Collaboration, Vendor Coordination, Fast Learning.
